NEW BLOOMFIELD, PENN'A. Tuesday, September 6, 1870.

MORE IMPROVEMENTS.

Although it is only eight mouths since we were compelled to purchase a new Washington press on account of our preposed collegement, the rapid increase in our circulation has again loveed us into making still greater improvements in our press-room, and to discard the hand press as too slow in its operations for printing the large number of papers we now circulate. We have accordingly purchased A NEW POWER PRESS.

which was made expressly for this office. It is of the style known as the " Potter Country Press," and was made by Messrs. C. Potter, Jr. & Co., of New York, and in appearance and workmanship reflects much credit on the makers. The ease and rapidity with which it does its work must be seen to be appreciated. This press is arranged to run by steam.

OUR ENGINE.

by which the press is to be driven, is an upright engine of three horse power, and is furnished by Messrs. Weimer & Bros., of Lebanon, Pa. It is one of the nicest arranged pieces of machinery that can be devised for a printing office; not only supplying ample power to drive three such presses, but taking up little more room than a stove-the use of which is dispensed with, as the engine supplies both power and heat.

We have now the only steam power press in the county and this, with other improvements we have added, make the Bloomfield Times office the most complete newspaper and job office in this section of the State.

Our steam press will run every Monday and Thursday afternoon, when those interested in such matters can see it in

Meeting of Congressional Conferees. The Conferees of this Congressional

District met at Bridgeport last Thursday. The candidates for nomination were Charles A. Barnett, Esq., of Bloomfield. Gen. Biddle and Col. R. M. Henderson, of Carlisle, and Wm. B. Raber, of Me-

After being properly organized, the meeting proceeded to ballot for a candidate to represent the Republican party on the Congressional ticket in the coming election, and on the fourteenth ballot, Elder Wm. B. Raber, receiving a majority of all the votes, was declared the candidate. The nomination was then made unanimous, and the meeting adjourned.

Senatorial Nominations.

The Democratic Senatorial Conferees have nominated R. B. Petriken, Esq., of Huntingdon, and Dr. Crawford, of Juniata, as their candidates for Senators for this District.

The Republican Conferees have nominated David Walker Woods, of Lewistown, and William Wilson, of Bellefonte, as their candidates for Senators.

The Fall State Elections begin with Vermont on the 6th of September, when Congressmen and local officials will be chosen. A spiritless canvass has thus far distinguished the Green Mountain State, nor is it likely to become livelier as election day approaches—the state being decidedly Republicau. It gave Grant upward of 32,000 majority, and last year the entire Republican ticket was chosen by 20,000. The estimated majority this fall is 80,000.

WAR NEWS.

From the various rumors which have been in circulation during the week past, it is evident that the Prussians are still having the best of the fight, though their success has been attained at a terrible cost. A dispatch from the Crown Prince says: "Our losses in the recent battles have been so great that I shrink from learning the actual facts."

The attention of the Prussian army for few days past has been occupied with MacMahon, endeavoring to prevent his effecting a junction with Bazaine, and consequently the advance on Paris has been stayed. Later despatches say that MacMahon is now so effectually disposed of, that the march on Paris will be again resumed. It is even rumored that his army is entirely destroyed, and that from ten to twenty thousand have been driven on to Belgium soil and were there disarmed. The large surface of country over which the recent battles have extended, render it difficult to get correct reports of the events which are so rapidly transpiring.

There is no doubt that a great part of the French reverses are owing to that nation having made no calculation for the battles being fought on French soil, but all their plans were laid with the expectation of being the invaders, instead of having to defend their own territory, while the Prussians made their plans to invade France and appear to know all about the roads, bridges, defences, and resources of every locality. This must be one of the secrets of their great success.

Since the above was written, we have despatches to the effect that Napoleon has surrendered his whole army, and that the war is virtually over. However much we may hope for the truth of this state-ment, we think it best to wait for further dispatches before believing it.

The Chinese Question.

The tide of public sentiment is setting strongly in favor of the adoption of strin gent laws at the new session of Congress under contracts engaging them to labor for a term of years. Similar legislation was adopted more than half a century ago to check the importation of the German redemptioners, who had been hired out to redeem or repay the cost of their passage to this country; and the hostility to the Chinese which is displayed in varitem, which has been tried by several countries has led to the perpetration of many acts of inhumanity to the Chinese, and if all other motives are thrown out of view, it should not be tolerated in any form. As particularly exemplified in the Peruvian guano islands, in Cuba, and in the French colonies, it united the infamies of slavery with the horrors of the slave trade, and if it was allowed to expand in this country unchecked by public opinion and Governmental interference, it would speedily become here, what it has been elsewhere, the fruitful cause of frightful sufferings.

The worst phases of this coolie system have never been tolerated by American authorities, for our Consuls have at least prevented the embarkation from China tion of the transportation hither of Chinamen whose passage-money is dependent their arrival here, will be a more difficult task than the prevention of the exportation of unwilling emigrants from the atively easy to deceive a Consul, or to evade stringent regulations on a point like this, and perhaps the best that can be done is to pronounce all contracts made for the proposed purpose not only null and void, but punishable by fine and imprisonment.

As comparatively few Chinamen belonging to the laboring classes can save money enough to pay in advance for the voyage across the Pacific, such a requirement would destroy all danger of an excessive influx of these people; and as white men alone can be naturalized, there would be no serious cause for either political or industrial apprehension in any quarter if it could be rigidly enforced.

From the notice this problem is now receiving-the above which we copy from the Inquirer, being only one of many on the same subject-it is evident some deeided action will be taken before long towards settling the question.

Hand bills Circulars and al kinds of Job Work, done promptly, at the Times Office. at New York, was issued last week.

A Singular Case.

Since the fall of the Pemberton Mills the city of Lawrence, Mass., has known no such excitement as that produced on Saturday, the 30th ult., by the unaccountable appearance of a female's features in a light of glass in the window of a house on Broadway. It appears that a few days previous to the discovery of the phenomenon, an elderly lady, after a and wearing sickness, had died. The day succeeding that on which the funeral occurred, a lady, who was visiting one of the tenants of the same house, in passing saw a figure in the attic window, which she instantly recognized as that of the deceased lady, and with great consternation communicated the fact to the other occupants of the building, and in a short time the entire neighborhood was made acquainted with the strange and exciting discovery.

The window of the room in which the woman had died was immediately under that in the attic, and was the usual sitting place of the deceased. None professed to believe a word of the wild story and were only convinced upon an actual view with their own eyes. A sister of the deceased, hearing of the matter, visited the place and pronounced the likeness to be that of her relative. The only remaining members of the family are two small children.

The excitement momentarily increased as also did the crowd in the street, and by noon it was so great as to render the passage of the horse-cars quite difficult. The inmates tried various means to remove it from the glass, but were unsuccessful, and, with a view of sending the crowds away, removed the sash to the rear of the building.

Early on Monday morning another crowd gathered around the house, and Dr. William D. Lamb, a prominent physician, obtained permission to remove the sash to his office, on Essex street. Here it was placed in his window, opening upon the main business street in the city, and every one could get a fine view from below. The window was examined by forbidding the importation of Chinamen intelligent and scientific men; and while some were of the opinion that it might be the result of the action of lightning. when some person had been sitting near, others thought the theory one of impos-

There is one thing about it, at least, that seems strange, and that is that no face or figure is to be seen in looking out ous quarters can scarcely fail to induce analagous action now. The coolie syssucceeded in getting a very good likeness of the sash and face it contained.

Experimenting on Whisky.

Dr. Parks of London, has been experimenting on a healthy soldier to find the effects of alcohol. He had him first take no alcohol for six days, then he took in divided doses, from 1 to 8 ounces of pure alcohol; then water for six days and then for three days twelve ounces of fine brandy containing forty-eight per-cent, of alcohol. The effect in modifying weight was in-appreciable. Alcohol produced little effect on the temperature of the system, though slightly raising it. The pulse was materially affected, rising from 77-5 before alcohol to 94-7 after the largest dose. Estimating the normal daily work for our shores of all persons who did not of the ventricles of the heart as equivaprofess a desire to try their fortunes in lent to the lifting of 122 tons a foot, it this new world. The special point now was found that during the alcoholic periwas found that during the alcoholic periaimed at, however, which is the preven- od the heart was compelled to lift an excess of 16-8 tons, and during the last two days of 24 tons. The conclusion was, upon the labors they are to perform after | that it was utterly useless in health, and positively injurious, in larger quantities than two ounces daily. There seemed to be indicated an advantage in its use if Flowery Kingdom. It will be compara- employed in rousing a feeble appetite and of exciting a feeble heart.

Robert Toombs undertook to cowhide a Methodist minister at Macon, Ga., the other day, but the godly man laid aside his spiritual armor, and with his carnal weapons choked Robert nearly to death.

Third parties are looming up in various parts of the country. In the East the Prohibitionists are running tickets on their own hook. On the Pacific coast there is an Anti-Coolie party; in the Northern and Middle States Labor Reformers are organizing, and in various places reform par-ties of various sorts. These third parties all lack political weight in their respective

The police of New York have arrested a man named Michael Ryan, on suspicion of being implicated in the murder of Mr Nathan. The evidence, so far, against him is slight, and no doubt he will be discharged. An occasional arrest as in this case, serves to revive public interest in the tragedy and convinces the public that the detectives still endeavor to carn the reward for the apprehension of the nurderer.

A most amusing scene occurred the other day on the departure of a Berlin regi-ment to the seat of war, at a Berlin railway A woman was dividing her farewell addresses pretty equally between two men, and every body supposed they must be her husband and her brother. After the train had gone a sympathizing specta-tor made the remark to her that it must come very hard on her to lose in this manner her husband and her brother at the same time. "Oh, you are mistaken, sir," exclaimed the weeping woman, "it was not my brother; one of them is my present husband, and the other is a man from whom I was divorced six months ago."

LET' A young couple started in a buggy last week to Scales Mound, Ill., for the pur-pose of being joined in wedlock. When nearing the railroad station the horse took fright and threw them into a deep ditch, from which they were extricated in a sad plight. The young man had his lips seri-ously damaged and the young woman suff-ered from two broken limbs and a sprained In all her troubles she declined to be sent home as she had come, and in the course of the afternoon the services of a civil officer were procured, and the pair made man and wife,

EFF C. Nutt, D. D., President Indiana State University, says: "Our Father's House," is a most useful, instructive and entertaining work. We most heartily recom-mend it. "Night Scenes," has met with unprecedented popular favor. We predict for this volume still increased popularity, and a still greater demand. See advertise ment in another column.

CHOLERA!!!

The following letter is from Mr. Woodward, of St. Louis, to J. N. Harris, Esq., of New London, Conn. Mr. W. is a gentleman of high respectability, and during the prevalence of the cholera in St. Louis, watched the result of the application of the Pain Killer for this disease, and his testimony can be relied upon with the utmost confidence:

can be relied upon with the utmost confidence:

DEAR SIR:—You recollect when I saw you in January last, my expressing to you my most sanguine expectations that DAVIS' PAIN KILLER would have a tremendous sale in the west this season, and my anticipations have been more than realized, and the testimony of thousands who have used it has been that they would not be willing to go to bed at night without it in the house.

On the appearance of the Cholera in this city, such was the confidence in the Pain Killer as a remedy, that many who purchased it remarked to me that they had no fears or dread of the cholera as long as they had the Pain Killer by them, and hundreds took it daily as a preventative, for no person can have a derangement of bowels or diarrhea if they use this medicine. This was the security and confidence of hundreds acquainted with it, and when their friends were attacked with the Cholera they would administer the remedy in large quantities, and in every case when it has been taken in any of the first stages of the disease, it has proved successful.

Leonsider it an infallible remedy. I have not

Teonsider it an infallible remedy. I have not beard of any individual in any family who used the Pain Killer when attacked but speedily recov-

ered.

The clerk informed me that he administered it to persons when cold or in cramps, and it gave immediate relief, but still it should be given quickly, for when the discharge of "rice water" has begun, the hope of life has fied. Should this disease make its appearance among you, as in all probability it will, be not alarmed; you all others there have the remedy, and I am confident if the Pain Killer is used, not a single death by Cholera will occur in your city.

Hespectfully, yours.

A. T. WOODWARD.

The Pain Killer is sold by all dealers in Famly Medicines.—3:—1m

"OUR FATHER'S HOUSE;"

The Unwritten Word.
